

Marking Gun P123

Why choosing the P123?

In comparison with previous marking gun P122, many improvements have taken place. The friendly use and the ease marking are multiplied.

- 1 **Best balancing**
 Reduction of vibrations and noise during marking, reduction of board weight, development of stationary engine and belt transmission

- 2 **Easy front plate adjustment**
 Thanks to a system allowing 4 predefined positions

- 3 **Compromise between robustness and lightness** thanks to a cast aluminum body, total weight of 3.7kg

4 **Best support** during marking with a rear support surface more ergonomic

5 **Improved output cable**, cuts are avoided with a stainless steel spring string

6 **Robotic** cable can be easily removed and changed, lengths available 7.5/10/15m

7 **Easy maintenance** with a removable handle hood and a one-piece front plate

8 **Great rigidity** during marking thanks to an one- piece front plate

9 **LED lighting** for a better vision of marking area
